

Diego Palmerín

Software Engineer

Merging Design and Engineering to create value.

Experience

Metabase Q:

Software Engineer CDMX

SEPTEMBER 2022 - PRESENT DAY

With my experience in UI/UX design, and full-stack development; My team and I work with stake-holders across the company to enhance our in-house technology offerings to better service our internal and external clients, bring new features to market, and enhance existing ones based on customer feedback.

UX/Development Engineer CDMX

APRIL 2022 - SEPTEMBER 2022

I worked closely with the product and engineering teams across the company to build a data infrastructure that could aggregate, clean, and store data that would allow our data-team to generate insights about our ongoing services and identify regional cybersecurity trends.

Web Developer CDMX

JANUARY 2021 - APRIL 2022

I designed and developed full-stack web applications and static sites, doing UI design, backend development, and infrastructure deployment. Alongside marketing and sales, we constantly sought to optimize UX, CX, and SEO.

GGD Bandas: Intern Tlalnepantla

JUNE 2017 - AUGUST 2017, TLALNEPANTLA

JUNE 2015 - AUGUST 2015, TLALNEPANTLA

I helped audit and organize documents of a bankrupt subsidiary. It helped me refine my Office skills and social abilities professionally.

Education

Tecnológico de Monterrey: B.S. Computer Science and Technology

AUGUST 2018 - DECEMBER 2022

I graduated with a 4.0 GPA with special courses on cybersecurity, web development, and biological algorithms. The degree differs from most CS majors in that it also incorporates software engineering and project management courses.

Projects

Spotify Visualizer: Passion Project, 2021

A full-stack application built to better understand WebGL, OAuth2.0 flows, and reactive design. I had previous experience working with Spotify's API and wanted to make something music-related. Here's a [write-up](#) explaining technical decisions, the development process, and performance enhancements made to the code.
